

Excel Module 2 Roadrunner Project:

Students in the past have had a point deducted for not finding the 'indigo, text 2' color (as requested in the instructions).

A student discovered this:

In step 1 you are asked to use the Slice theme. However, under page layout, it asked us to choose "office" as the theme. In the newer versions there is an option to the right of that that reads "office 2013-2022", this is the preset color scheme that they were looking for and has the "indigo, text 2" on it.

Hope this helps.
